

## **SECTION IV**

### **SUMMARY**

In summary, we know that we have constructed the safest vehicle ever built for the Drag Strip. We also know that we have the expertise to operate it.

I have explained, briefly, how the car and system works and why it works the way it does. We know the car to be safe. If there are any questions or other points of concern I would be glad to explain them.

Rocket Cars have, for the past 10 years, been in testing and development stages by various people and mishaps were bound to occur. At this point, however, we feel that Rocket Propulsion Systems and the cars that contain them reached their own. Our car was built from the ground up especially for our system, as we feel all Rocket Vehicles should be. The Rocket in Drag Racing is definitely the thing of the future, as the world enters the Space Age. It is our goal to exhibit to the public, the laws of Rocket Propulsion as applied to a Drag Racing Vehicle and prove that these systems can be operated very safely and efficiently. We will stop at no ends to do this.

*Can you compare this car to a conventional car?* We feel that due to the lack of moving parts, safety systems incorporated into the system, handling characteristics of the car, weight of the vehicle, non-combustibility of the fuel used, and our operation procedure, there is NO FAIR COMPARISON!

This car and cars of its nature are so much safer than conventional vehicles there is no comparison. Hydrogen Peroxide Rocket Belts were flown over the crowd at the World Fair in Canada for almost two weeks without a mishap.

We are prepared to back up every statement made. We feel very strongly about the safety aspect of this car and wish them to be recognized as something other than a High Risk Show Piece.

Unfounded Rumors, tales of Fire Breathing Dragons, assumptions made by Master Showmen, and a total misunderstanding of Rocket Propulsion as applied to a Motor Vehicle, MUST NOT condemn these cars to extinction. Its time someone told the truth about these cars and they are accepted for the SAFE, RELIABLE, maintenance free vehicle they really are.
